Thirty-one years ago Allen L. Wood started in the nursery business on one acre of land. He promised himself to sell only the best plants in the world, or he would not sell any. The result of his perseverance has been the establishment of the largest mail order business of its kind in the United States.

It was in the Centennial year that Mr. Wood started to do a wholesale business in small fruit plants. He named his nurseries the Woodlawn Nurseries, and any plants or trees bearing this name are guaranteed to be the best grown.

In the year 1881 Mr. Wood had ten acres of land under cultivation, and this increased to seventy-five acres by 1891. In 1900 he had one hundred eighteen acres under cultivation, which was necessary to produce the plants to keep pace with the orders of his ever increasing business.

It was in the year 1890 that he was called "King of Small Fruit Growers," because he grew more small fruit plants than any three combined nurserymen in the country.

Until 1900 Mr. Wood was strictly in the wholesale business, devoting his entire time to the growing of small fruit plants, and having made a success of the wholesale branch of the business, he decided at that time to send out a retail catalogue for express and mail orders. From an insignificant beginning, when he only had one customer in a village or township, he now has 100,000 customers, scattered all over the states and territories.

This shows what close attention to business has done for him, and the confidence his patrons have placed in his guarantee, that goes with all shipments of nursery stock. Many orders are received from foreign countries, and the mail order department of the business alone requires a large number of trained assistants.

Mr. Wood continues to grow all his own trees and roses, and is therefore sure that they are vigorous, hardy and true to name.

A nursery business that has been built up from nothing and has grown to the largest of its kind in the world, is a recommendation in itself to intending purchasers.

If you have perfect plants to start with, grown strong and hardy, you are pretty sure of getting big crops, and it is better to begin right by buying right on the start, without experimenting, and thereby losing time and money.

Begin right this year. Plant better trees and save half of your money and buy your nursery stock from the Woodlawn Nurseries, Rochester, N. Y.

The financial standing of the Woodlawn Nurseries is quoted in Dun's or Bradstreet's mercantile reports, which may be seen in any bank or large business house in the country.

The Woodlawn Nurseries
ROCHESTER, N. Y.
ORDER SHEET--PLEASE USE THIS SHEET IN ORDERING PLANTS No.

HOW TO ORDER.- We employ no agents. This Catalogue is our only salesman. Fill out this Order Sheet with the items you want to buy, enclosing Postal Money Order or Bank Draft on New York, and mail all to us in enclosed envelope. By this method you save half the money you would have to pay agents for trees. We have filled orders in this way for thirty years, and are well known all through the country. You can learn of our responsibility through any commercial agency, bank or banker, or of the postmaster at Rochester, N. Y. We pack and ship all Winter to Southern States. Our regular Spring Shipping Season opens about March 15. State positively how we are to ship, whether by Freight, Express or Mail. If by Freight or Express, give name of R. R. station and your post office.

Please write below the names and address of a few of your friends who are interested in and buyers of TREES, PLANTS, ETC.
Three Grades of Apple Trees.

Extra—First-Class—Medium.

You can save from $50 to $100 in buying your trees from us. We grow the trees ourselves and they go direct from us to you. We do not employ any agents to sell our trees, for the trees themselves are all the agents we need. When you buy our trees, you pay the actual cost of growing and our very small profit, and not some agent’s exorbitant price. We sell thousands of trees every year, but an agent may only sell a hundred, and he must charge you enormous prices in order to meet his expenses. Since we grow our own trees we know they are true to name.
The varieties of Apples named are beyond doubt the most profitable for market and best bearers for orchard and home use. You run no risk whatever in making your selections from these. Our trees, we know, will please you. Our Apple Trees are the largest and best we have ever grown.

Price of first class Apple Trees, except where otherwise noted, 2 to 3 years, 5 to 6 feet high, 18c. each; $2.00 per 12; $12.50 per 100. Extra size, 6 feet high, 20c. each; $2.25 per 12; $15.00 per 100.

Red June—Fruit small; deep red over yellow; flesh tender, juicy, sub-acid; very attractive for market. A good growing variety for the South and West.

Red Astrachan—Large, roundish, nearly covered with a deep crimson, overspread with a thick bloom; very handsome; juicy, good, though rather acid. The tree is very hardy and a good bearer; highly esteemed on account of its fine appearance.

Sweet Bough (Large Yellow Bough)—Large; greenish yellow; sweet, tender and juicy. Tree a moderate, compact grower and abundant bearer.

Early Harvest—Medium to large size; pale yellow; tender with a mild, fine flavor. Tree a moderate, erect grower, and an early bearer; an excellent variety for dessert or cooking.

Yellow Transparent—A Russian apple; medium size, roundish; skin greenish yellow when fully ripe; flesh juicy, sprightly, sub-acid; a free grower.

Fall Pippin. One of the old household favorites.

Dear Sir:—We received the trees today. They are good, strong trees and came in fine condition. Many thanks for your prompt attention to the order.

E. H. Kinnan.
York Imperial. Prized in Pennsylvania as a winter apple.

Select Fall Apples

Fall Pippin—Very large, roundish; yellow; flesh tender, rich and delicious. Tree a free grower and fine bearer; one of the most valuable varieties for table or market. An excellent baking apple. Extensively grown in Western New York as Holland Pippin.

Maiden’s Blush—Large, flat; lemon yellow with a red cheek; tender, very juicy, but not highly flavored. Tree is an erect free grower and heavy bearer. A standard market apple.

Red Bietigheimer—A rare and valuable German variety. Fruit medium to very large; roundish; skin pale, cream colored ground mostly covered with purplish crimson; flesh white, firm, sub-acid with a brisk, pleasant flavor. Tree is a good grower and bearer.

Fameuse (Snow Apple)—Medium size; deep crimson; flesh snowy white, sometimes streaked with red, tender and delicious; one of the finest dessert fruits and valuable for market. Tree vigorous, succeeds particularly well in the North.

Chenango (Autumn Strawberry)—Large, oblong; yellowish-white striped with red; highly valued as a table or market fruit on account of its handsome appearance and good quality. It is very productive.

Gravenstein—A very large, striped, roundish apple of the first quality. Tree erect in growth and very productive. One of the finest fall apples for both domestic and foreign markets.

Oldenburg (Duchess of Oldenburg)—A large, beautiful, Russian apple; roundish; streaked red and yellow; tender, juicy and pleasant. Tree a fine grower and abundant bearer. Very hardy. Succeeds well in the Northwest, where most varieties fail. A good shipping apple.

Twenty Ounce—A very large, showy, striped apple; excellent for baking. Good shipping apple. Tree a free grower and fine bearer.

Wealthy—Fruit medium, roundish; skin smooth, mostly covered with dark red; flesh white, fine, juicy, sub-acid, very good. Tree very hardy and productive. A variety of much value on account of its great hardiness and good quality.

Price of Wealthy apple trees, 2 to 3 years, 5 to 6 feet high, first class, 20c. each; $2.25 per 12; $15.00 per 100. Extra size, 6 feet high, 25c. each; $2.50 per 12; $20.00 per 100.

“Stock arrived in excellent condition and I am well pleased with your square dealing.”

This letter from Allan M. Finnell, Ohio, tells what we try to do for every customer.
Arkansas Black—Medium to large; red striped over contrasting yellow; fine-grained, brisk sub-acid; of best quality. A seedling of Winesap, resembling it in fruit, but much larger.

Gano—Fruit medium to large; equal to Ben Davis in productiveness and size; brilliant red; flesh juicy, mild sub-acid. Good storage apple.

Rambo—Medium size; streaked and mottled yellow and red; firm, juicy, mild flavored. Good grower and bearer. A widely cultivated and esteemed old variety.

Ben Davis—A large handsome, red striped apple, of very good quality. Tree very hardy and productive; a late keeper; leading commercial apple in the West and Southwest.

Jonathan—Medium; deep red, high quality. Early and abundant bearer; very productive. An excellent family apple and very profitable for market, selling at highest prices. Extensively grown in the Eastern States.

Stayman Winesap—Large; roundish; deep red; medium quality; keeps well. Tree a moderate grower and good bearer; succeeds well in the West, and is there valuable and popular. Not grown here in orchards.

Grimes Golden (Grimes' Golden Pippin)—Medium to large size; skin deep yellow sprinkled with russet dots; flesh very firm, crisp, juicy, very good to best. Tree hardy, productive; grown in the South and Southwest.

Yellow Belleflower—Fruit variable in size, small to very large; bright pale yellow; flesh firm, crisp and juicy. Especially productive in the Pacific States.

Rome Beauty—Large; yellow and bright red; handsome; medium quality; a moderate grower and bearer; good storage variety.

York Imperial—Medium; yellowish, firm, juicy, sub-acid. Tree moderately vigorous and productive. Leading market variety in the Middle Western States and Pennsylvania.

King—A superb red apple of the largest size and finest quality. Tree a vigorous grower and good bearer; hardy.

Hubbardston (Hubbardston Non-Such)—Very large; striped yellow and red; tender, juicy and fine; a free grower and great bearer. One of the best late apples.
Golden Russet—Medium size; golden russet with a bronze cheek; flesh yellowish, crisp, juicy and highly flavored. Tree a vigorous grower, hardy, bears well; extensively grown in Western New York and Wisconsin.

Northwestern Greening—Fruit medium to very large; clear yellow or greenish; flesh medium in crispness and firmness. It is harder than the Rhode Island Greening, but not as good in quality.

Baldwin—Large, bright red, crisp, juicy and rich. Tree very vigorous, upright and productive. In New England, New York, Ontario and Michigan this is one of the most profitable sorts for general market, dessert and storage uses.

Roxbury Russet—Medium to large; skin moderately tender, largely covered with greenish to yellowish-brown russet. Tree a free grower and great bearer. Excellent for Southern and Western trade.

Tolman’s Sweet—Medium size; whitish yellow, very sweet and moderately juicy; good cooking apple. Very productive.

Willow Twig—Fruit medium to large; yellowish green, irregularly striped with red; flesh greenish, very firm, crisp, juicy, highly flavored; strong grower and early and regular bearer. Grows well in the Northern States.

Seek-No-Further (Westfield)—Large; deep yellow or greenish shaded with dull red; flesh pale yellow, firm, juicy, mild sub-acid. Tree is an excellent grower.

Rhode Island Greening—Everywhere well known and popular; tree spreading and vigorous; always more or less crooked in the nursery; very productive in nearly all soils and situations; fruit rather acid, but excellent for dessert and cooking.

Bargain Prices of R. I. Greening. First class apple trees, 2 to 3 years, 5 to 6 feet high, 15c. each; $1.50 per 12; $11.00 per 100. Extra size, 6 feet high, 18c. each; $2.00 per 12; $12.50 per 100.

Walbridge—Medium size, skin moderately thin, tough, smooth, striped red; flesh whitish, tinged with yellow, firm, juicy, mild sub-acid. Tree a moderately vigorous grower.

Sutton Beauty—Fruit medium; bright red, sometimes striped; very productive. One of the most valuable fancy market varieties in Western New York.

Winter Banana—Fruit very large roundish; yellow with contrasting blush; flesh whitish to pale yellow, firm, crisp, juicy. Tree is a good grower and yields heavy crops.

McIntosh Red—Large, roundish, skin mostly covered with bright red; flesh white, tender, sub-acid, sprightly, very good. Tree vigorous and hardy.

Northern Spy—Large, striped and quite covered on the sunny side with dark crimson, and delicately coated with bloom. Flesh juicy, rich, highly aromatic, retaining its freshness of appearance and flavor till July. The tree is a remarkably rapid grower and a great bearer. Like all trees of the same habit, it requires good culture and occasional thinning out of the branches to admit the sun and air fully to the fruit. One of the finest late keeping apples.

Price of McIntosh Red; Sutton Beauty; Winter Banana and Northern Spy, 2 to 3 years, 5 to 6 feet high, first class, 20 cts. each, $2.25 per 12, $15 per 100. Extra size 6 feet high, 25 cts. each, $2.50 per 12, $20.00 per 100.

We also have the following varieties of apples: Wolf River, Fall Pippin, Pound Sweet, Golden Sweet, Salone, Stark and Pewaukee.

Dear Sir:—Order received. All stock was satisfactory in every way and is doing fine.

Alice S. Eldridge.
Price of Standard Pears, except where otherwise noted, first class trees, 2 to 3 years, 5 to 6 feet high, 25c. each; $2.50 per 12; $20.00 per 100. Extra size 6 feet high, 30c. each; $3.25 per 12; $25.00 per 100.

Price of Dwarf Pears, first class trees, 2 to 3 years, 3 to 4 feet high, 20c. each; $2.00 per 12; $12.50 per 100.

SELECT

Pears

Summer Pears

Bartlett—One of the most popular pears; large, buttery and melting, with a rich flavor. A vigorous erect grower; bears young and abundantly. It ranks first as a commercial pear and favorite with the fruit canning public, who appreciate quality; it takes the highest price on all markets.

Clapp’s Favorite—A splendid pear, resembling the Bartlett, and ripening ten days earlier; the tree is hardy and vigorous. Clapp’s Favorite is practically the Earliest Maturing Variety that growers are giving any attention to; its great beauty added to its fairly good quality has made it desirable for market purposes.

Price of Standard Bartlett and Clapp’s Favorite Pears, 2 to 3 years, first class trees, 5 to 6 feet high, 30 cts. each, $3.25 per 12, $25 per 100. Medium grade 4 to 5 feet high, 25 cts. each, $2.50 per 12, $20 per 100. Extra size 6 feet high, 35 cts. each, $3.60 per 12.

Price of Dwarf Bartletts and Clapp’s Favorite, 2 to 3 years, 3 to 4 feet high, 25 cts. each, $2.50 per 12, $20.00 per 100.

Tyson—Rather above medium size; melting, juicy, sweet. Tree a very vigorous and rapid grower; bears abundantly every year; one of the best summer varieties.

Wilder—Medium or rather small, regular in form; greenish-yellow with a brownish-red cheek. Tree a good grower and great bearer.

Autumn Pears

Duchess—One of the largest of all our good pears. As a dwarf it is one of the most profitable of market pears.

Flemish Beauty—A large sweet pear. Tree very hardy, vigorous and fruitful; succeeds well in most parts of the country.

Howell—One of the finest of American pears. Large, yellow and handsome. Tree very vigorous, hardy and productive.

Keiffer—Large; skin rich golden yellow; flesh slightly coarse, juicy, melting, with a pronounced quince flavor. Tree very hardy and an early and great yielder.

Seckel—The standard of excellence in the pear; small but of the highest flavor. Tree a stout, slow, erect grower. Ranks second in importance as a commercial fruit and is a favorite with the fruit canning public, who appreciate quality.

Price of Standard Seckel Pears, 2 to 3 years, first class trees, 5 to 6 feet high, 30c. each; $3.25 per 12; $25.00 per 100. Medium grade, 4 to 5 feet high, 25c. each; $2.50 per 12; $20.00 per 100. Extra size, 6 feet high, 35c. each; $3.60 per 12.

Price of Dwarf Seckel, 2 to 3 years, 3 to 4 feet high, 25 cts. each; $2.50 per 12; $20.00 per 100.

Sheldon—A pear of the very first quality; large, round; russet and red; melting, rich and delicious. Tree vigorous, erect and handsome, and bears well.

Winter Pears

Anjou—A large handsome pear; buttery and melting; keeps until the winter holidays, when it commands very high prices in the market.

Vermont Beauty—Medium size; yellow, covered on sunny side with bright carmine red; rich, juicy, sub-acid. Ripens immediately after Seckel. Very hardy.

Clairgean—Very large, handsome and attractive; flesh yellowish; keeps sound a long time after being gathered. Tree a free grower and an early bearer; valuable for market.

Lawrence—Size, medium to large; golden yellow. Tree a moderate grower and an abundant bearer.
Cherries succeed well in dry soils. Every fruit garden should have one or more cherry trees. We do not believe there is a single town in the United States where the market has been well supplied with the delicious fruit. The demand has always been greater than the supply. Farmers and fruit growers need not fear to plant this fruit largely. The trees are extra fine, large and well rooted.

Large Montmorency—Most popular of all hardy cherries, for market and home use. This cherry is planted more largely in orchards than any other kind. It is of a large size and bright red in color. Stems rather short. The tree is very hardy and a vigorous grower; bears fruit soon after planted.

Early Richmond—This is one of the most commonly grown varieties and ranks as one of the best of the old varieties. Tree is hardy and vigorous and is a regular bearer. We have an old Early Richmond tree in our yard and it is heavily loaded with fruit almost every year. The fruit does not rot upon the tree, and can be left without picking longer than most varieties; an early red acid cherry.

English Morello—Without doubt one of the most valuable of this class. Fruit dark red; good quality with a rich acid flavor; late; an excellent shipper. Very hardy, and recommended for extremely cold latitudes.

Prices for Cherry Trees of the following varieties, Large Montmorency, Early Richmond and English Morello, first class, 2 to 3 years, 4 to 5 feet high, 25c. each; $2.50 per 12; $20.00 per 100. Extra size, 5 feet high, 30c. each; $3.50 per 12; $25.00 per 100. Medium grade, 3 to 4 feet high, 20c. each; $2.00 per 12; $15.00 per 100.

Black Tartarian—One of the oldest and most popular market varieties. Fruit, very large; dark red skin; fine quality; brings the highest market price.

Gov. Wood—Recommended from nearly all sections for nearby markets and home use. Tree a strong and vigorous grower; very productive; fruit medium to large; pale yellow with a light red blush; good quality.

Windsor—Tree upright, vigorous and a rapid grower. Fruit large, roundish; skin, dark liver colored; fine quality; ripens about ten days after Black Tartarian; a very desirable late cherry. Fruit hangs a long time after ripening and does not rot badly. Excellent shipper.

Prices for Sweet Cherry Trees of the following varieties, Black Tartarian, Gov. Wood and Windsor, first class, 2 to 3 years, 5 to 6 feet high, 35c. each; $4.00 per 12; $30.00 per 100. Extra size, 6 to 7 feet high, 40c. each; $4.50 per 12; $35.00 per 100.

There are some select combination orders in our Bargain List that ought to be of interest to you.
Burbank—Most Profitable for Market.

Plum Trees at Bargain Prices! We have ten acres of 2 and 3 year old plum trees, that are extra nice, on rented ground, which we will have to dig as our lease expires May 1st, 1907. You will never have the chance to buy plum trees at such a low price again. These prices are good only while the stock lasts.

Prices of Plum Trees, first class, 2 to 3 years, 5 to 6 feet high, 20c. each; $2.00 per 12; $12.50 per 100. Extra size, 25c. each; $2.50 per 12; $15.00 per 100. Medium grade, 4 to 5 feet high, 15c. each; $1.50 per 12; $10.00 per 100.

Abundance—One of the oldest and best known Japanese varieties fruit large, bright cherry red; flesh, light yellow, juicy, tender, sweet; hardy and productive.

Bradshaw—A very large and fine early plum; dark violet red; juicy; productive; fine for market.

Guella—Large, bluish purple; flesh yellowish-green, rather coarse; sweet, pleasant; one of the best market varieties.

Lombard—Violet red; flesh yellow; leading market variety. Tree a very strong, vigorous, upright grower; an early and very abundant bearer; more largely planted for market and canning than any other plum.

Shropshire Damson—Medium; dark purple; very productive; best for preserving.

Moore’s Arctic—Size medium; purplish-black, with a thin blue bloom; flesh greenish-yellow, juicy, sweet, and of pleasant flavor. Tree healthy, vigorous; an early and abundant bearer.

Burbank—Best and most profitable among growers for market. Ripens very early; fruit large, excellent quality; amber turning to a rich cherry red. Tree hardy, sprawling, vigorous grower, unequaled in productiveness; bears young.

German Prune—Medium; oval; blue, juicy, rich. Tree vigorous and very productive.

Fellenberg (French or Italian Prune)—A fine late purple prune; flesh juicy and delicious; fine for drying. Tree a free grower and very productive.

Red June—Recommended as “by all odds the best Japanese Plum, ripening a week after the Abundance.” A vigorous, upright grower; productive; fair size, purplish red; pleasant quality.

Shippers’ Pride—Large, dark purple, very showy; fine, juicy and sweet.
To secure healthy, vigorous and fruitful trees and fine fruit, the following points must be well attended to in peach culture: 1st. Keep the ground clean and mellow around the trees, and give it an occasional dressing of wood ashes. 2nd. Keep the heads low—the trunks ought not to exceed three feet in height. 3rd. Attend regularly every spring to pruning and shortening the shoots of the previous year’s growth. This keeps the head round, full and well furnished with bearing wood. Cut weak shoots back about one-half, and strong ones one-third, but see that you have a sufficient supply of fruit buds. Sickly and superfluous shoots should be cut clean out.

**NOTE**—In planting Peaches, it is of the highest importance to cut back the trees severely. The stem should be reduced about one-third and the side branches cut back to one bud. This lessens the demand upon the roots, and enables the remaining buds to push more vigorously. Most failures in newly-planted orchards may be ascribed to a non-observance of these directions.

**Price of first class Peach Trees,** 3 to 4 feet high, well branched, 15c. each; $1.50 per 12; $10.00 per 100. Extra size, 18c. each; $1.80 per 12; $12.00 per 100.

**Alexander**—Medium to large size; skin greenish-white, nearly covered with deep rich red; flesh juicy and sweet. Tree vigorous and very productive; one of the largest and best of early varieties; valuable for market as well as for home use. Freestone.

**Chair’s Choice**—Extra strong grower, bearing at four years of age from three to four bushels of fruit; large size; firm yellow; very handsome and of good quality. Freestone. Ripens after the Elberta.

**Elberta**—Unsurpassed as a valuable, large, beautiful peach of good quality. One of the best varieties for orchard and garden. Large yellow peach, with a red cheek; juicy and highly flavored. Freestone.

**Golden Beauty**—Medium size; yellow, with a bright red cheek; hardy, very productive; fruit, good quality; early bearer.

**Mountain Rose**—Large; flesh white, juicy, very good; productive. An excellent early market variety. Freestone.

**Sneed**—Earliest of all peaches. White; excellent quality; very productive; does not rot. Clings slightly to the pit.

**Elberta**—One of the Best Orchard Varieties.

**Yellow St. John**—Fine early yellow peach, nearly as large as Crawford, as finely colored and of even better flavor. Fruit round, brilliant; attracts attention and sells well. Tree bears while small and abundantly afterwards. Freestone.

**Champion**—Early; large, handsome, creamy white with red cheek; sweet, rich, juicy. Hardy and productive. Freestone.

**Crosby**—Large, handsome yellow peach; small pit; very delicious; ripens between Early and Late Crawford. Freestone.
Chair's Choice.

Carman—Large, resembles Elberta in shape; color, creamy white or pale yellow with a deep blush; skin very tough, flesh tender, fine flavor and quite juicy. Freestone.

Crawford's Early—A magnificent, large, yellow peach, of good quality. Tree exceedingly vigorous; its size, beauty and productiveness makes it one of the most popular varieties. Freestone.

Crawford's Late—A superb yellow peach; very large, productive and good; ripens here about the last of the peach season. Freestone.

Niagara—This is one of the largest and most profitable of peaches on the market. Large yellow; ripens between Early Crawford and Elberta. Freestone.

Triumph—Southern peach; freestone; ripens with the Alexander; large yellow, nearly covered with red; flesh, bright yellow when fully ripe and of excellent flavor.

Kalamazoo—A leading market variety. Large; yellow; excellent quality; productive and profitable. Freestone.

---

Pleasing

Vermont, May 12, 1906.

Dear Sir:—The trees and plants ordered of you came in fine condition and are satisfactory in every way. For the past 20 years I have been planting a few trees and plants each year, and those I received from you are the best I have ever seen. Trees are nice and thrifty, and plants are large and well rooted.

W. H. Alexander.

---

West Virginia, April 8, 1906.

Dear Sir:—I received my trees all right and in good condition. Everything is growing fine. Thanks for prompt shipment.

F. F. Robey.

Dear Sir:—Trees received O. K. last week. They are the finest I have ever bought.

John C. Bachofr.

---

SELECT
Quinces

Price of Quince Trees, first class, 3 to 4 feet high, 40c. each; $1.50 per 12; $30.00 per 100.

Apple or Orange—Large, roundish with a short neck; of a bright golden yellow color. Tree has rather slender shoots and oval leaves; very productive. This is the variety most extensively cultivated for the fruit.

Bourgeat—A new golden variety of the best quality. Tree a remarkably strong grower, surpassing all others, yielding immense crops, fruiting at three and four years in the nursery row. Fruit of largest size, round, rich golden color, smooth; very tender when cooked. Keeps until midwinter in perfect condition.

Champion—A prolific and constant bearer, fruit averaging larger than the Orange, more oval in shape, quality equally fine, and a long keeper; bears extremely young. Ripens late.

Rae (Rae's Mammoth)—A very large and fine variety of Quince. A strong grower and productive.
Almost every farm contains land that should be planted to nut trees adapted to the soil. Probably no branch of tree cultivation pays larger profit or is as well assured of a profitable market for all products, the nuts in many cases paying better than farm crops or fruits, while most kinds are making a growth of valuable timber that will of itself pay a large percent on the investment.

Our nut trees are two and three years old.

Butternut, or White Walnut—A fine native tree producing a large, longish nut, which is prized for its sweet, oily, nutritious kernel. Price of Butternut trees, 3 to 4 feet high, 35c. each, $3.00 per 12.

Japan Chestnut—Very distinct from all other chestnuts, dwarf grower, productive, usually producing nuts when two or three years old. Nuts of immense size, far surpassing all other kinds; of fair quality when outside skin is removed. Price of Japan Chestnuts, 3 to 4 feet high, 50c. each, $5.00 per 12.

Filbert, English—Of easiest culture, growing six to eight feet high, entirely hardy, and one of the most profitable and satisfactory nuts to grow, succeeding on almost all soils, and bearing nuts abundantly, nearly round, rich and of excellent flavor, admired by all for dessert. Price of Filbert English, 3 to 4 feet high, 35c. each, $3.00 per 12.

Walnut, Black—A native tree of large size and majestic form, beautiful foliage. The most valuable of all trees for its timber, which enters largely into the manufacture of fine furniture and cabinet ware, and brings the highest price in market. Tree a rapid grower, producing a large round nut of excellent quality. Price of Walnuts, Black, 3 to 4 feet, 35c. each, $3.00 per 12.

Walnut, English—A fine lofty growing tree, with handsome spreading head. Where hardy it produces immense crops of thin-shelled delicious nuts, which are always in demand at good prices; in green state is highly esteemed for picking. In California and the South large orchards have been planted that are yielding immense profits. Not hardy enough for general culture in the North. Price of English Walnuts, 2 to 3 feet high, 50c. each, $5.00 per 12.

American Chestnut—A valuable native tree, both useful and ornamental; timber is very durable, and possesses a fine grain for oil finish. Nuts sweet, of delicate flavor, and are a valuable article of commerce. No farm should be without its grove of nut-bearing trees, and the chestnut should be foremost wherever the soil is adapted to its growth. Price of American Chestnut, 4 to 5 feet high, 35c. each, $3.00 per 12.

Spanish Chestnut—A handsome round-headed tree producing abundantly very large nuts that find a ready market for good prices. $25 have been realized off one fruiting from nuts of a single tree. Not as sweet as the American and tree not as hardy. Price of Spanish Chestnut, 2 to 3 feet high, 35c. each, $3.00 per 12.

Pecan—Not hardy in the North; one of the best and most profitable where it succeeds. Makes a very large, tall tree, producing its thin shelled delicious nuts in profusion. Price of Pecan, 15 to 18 inches, 35c. each, $3.00 per 12.

Walnut, Japan—Perfectly hardy, rapid grower, handsome form, immense leaves; bears young and abundantly; resembles Butternut in shape and quality; smaller with smooth and thinner shell. Worthy of extensive planting. Price of Walnut, Japan, 4 to 5 feet, 50c. each, $5.00 per 12.

Hickory, Shell Bark—To our taste no other nut that grows, either foreign or native is superior to this in quality; it possesses a peculiar, rich nutty flavor excelled by none. The tree is of sturdy lofty growth. The wood, on account of its great strength and elasticity, is highly prized for making agricultural implements, and is unsurpassed for fuel. Price of Hickory, Shell Bark, 3 to 4 feet, 50c. each, $5.00 per 12.

13
Hybrid Perpetual Roses are the most valuable for outdoor planting wherever a permanent bed is desired. They are perfectly hardy and will stand our most severe winters, and when once established they improve in beauty every year. They will do well almost anywhere, but delight in a deep, rich soil. A mulching of straw or leaves will greatly benefit them if applied in the fall and allowed to remain until spring.

Prices of strong, two years old, field-grown Roses, 20c. each; 6 for $1.15; 12 for $2.25.
Roses sent by mail or express prepaid, 25c. each; 6 for $1.30; 12 for $2.50.

Alfred Colomb—A superb carmine crimson rose; very large; full and extremely fragrant. The most useful rose for general cultivation.

Clio—A rose of perfect form and finish, with broad, thick petals, high, full center, beautiful from pointed bud to fully opened flower. The color is a delicate satiny blush, with slightly deeper center. The plant is strong and blooms freely, displaying its great flowers on good stems against large, rich leaves.

Coquette des Alpes—White, shaded slightly with pink; large and full. Very dainty and attractive.

Duke of Edinburgh—Brilliant crimson-scarlet, shaded with maroon.

La France—Delicate silvery rose, often silvery pink, with peach shading, very large, full and of superb form. It flowers continually throughout the season; the sweetest of roses and none can surpass the delicacy of its coloring.

Margaret Dickson—A large and handsome white rose with pale flesh center, of extra vigorous growth. Its large petals are thick and shell-shaped; very fragrant.

Mrs. J. H. Laing—An exceptionally handsome and free-blooming rose, of vigorous growth and fine habit. The color is a soft delicate shade of pink; flowers are large and well formed, fragrant and produced on fine stems. A variety of special value, as it blooms continuously in the open ground, and is also excellent for forcing, the buds selling at high prices.

Crested Moss—Very fragrant, deep pink rose, surrounded with a mossy fringe and crest. Very beautiful.

Earl of Dufferin—Rich crimson-maroon, with dark and velvety shadings. The flowers are large, full, globe-shaped, thick-petaled and very fragrant. Grows well and blooms freely, with many handsome buds in autumn. This is one of the finest dark roses and should be in every garden.

General Jacqueminot—Rich crimson rose; simply a mass of bloom when at its best. A famous forcing rose but quite as well adapted for general culture; very hardy.

Marchioness of Londonderry—Ivory-white flowers of great size, perfectly formed, on good stems; highly perfumed; free blooming.

Mabel Morrison—White, sometimes tinged with blush, similar to Baroness Rothschild in all save color.

Marshall P. Wilder—A very desirable rose for cut flowers; flowers are large and perfect in form, on good long stems. Bright cherry red, changing to crimson; fragrant; the finest of its color.

Mrs. R. G. Sharman-Crawford—Grandly formed flowers of a deep rose pink; pale pink on the outer petals; flowers are produced on splendid stems; growth vigorous and blooms from early summer until autumn.

FRAU KARL DRUSCHKI.

Frau Karl Druschki—This exquisite new rose is absolutely the purest white rose ever introduced. It is of German origin and is a cross between the Mad. Caroline Testout and the grand old white rose Merveille de Lyon. It possesses the free-blooming qualities of the former and the robust growth of the latter. It is a vigorous grower, throwing up enormous shoots which are covered with snow-white blossoms.
American Beauty—One of the largest and most beautiful of the hardy roses. Flowers very large and double, and delightfully fragrant, color a rich crimson. Plant a strong grower and continuous bloomer. It will make a much stronger growth, if not allowed to bloom the first summer. Pinch off the larger portion of the buds—better, all of them. This will not be necessary the second season, as the plant will then be strong enough to make both growth and bloom.

Paul Neyron—The largest pink rose in cultivation, sometimes called the Peony Rose; deep rose color; very desirable as a garden rose; valuable for forcing; blooms almost without intermission from June until late in October.

Persian Yellow—Bright yellow, small, nearly full. It is desirable to grow more than one plant, and by pruning one plant one year, and the other the next year, annual crops of flowers may be had.

Anne de Diesbach—Beautiful shade of carmine.

Baron de Bonstettin—A rich velvety maroon.

Baroness Rothschild—Exquisite pale pink.

John Hopper—Bright red with a dark center.

Prince Camille de Rohan—A velvety, blackish-crimson rose, of deep, distinct shade; large, full, very handsome.

Ulrich Brunner—A rose of beautiful form and finish, very striking brilliant cherry-crimson. The bush is vigorous, blooming continuously in the open air, and displaying its superb, glowing flowers on good stems.

Madame Plantier—Pure white.

Magna Charta—Beautiful pink.

Marie Van Houtte—Creamy white, with outer petals of pale pink.

You get nothing but first quality of stock from "The Woodlawn"

BABY RAMBLER

The greatest sensation in the Rose trade for many years.

A dwarf (Bush not Climbing) form of Crimson Rambler and, furthermore, Ever-blooming. Will bloom continuously through the summer, if planted out-of-doors. Has the same bright crimson color as the climbing Crimson Rambler, and blooms in clusters of 20 to 40 flowers at one time on plants of fair size. "Baby Rambler" is one of the best red roses for bedding and is going to be just as popular and as extensively planted as the climbing form has been. It will grow and bloom with but ordinary treatment from one year's end to another when planted in pots in the house. We have grown a nice lot of thrifty plants for our retail trade, and expect to please every customer by furnishing the best rose novelty of recent years.

Price of Baby Ramblers, 2 years old, field-grown plants, 25c. each; 6 for $1.30; 12 for $2.50.

Baby Ramblers sent by mail or express prepaid, 30c. each; $1.50 per 6; $2.85 per 12.
HARDY CLIMBING ROSES

Prices of all varieties of Climbing Roses, strong, 2 years old, field grown plants, 25c. each; 6 for $1.25; 12 for $2.40. If sent by mail add five cents to each plant.

Crimson Rambler—A beautiful climbing rose from Japan, bearing large clusters of glowing crimson flowers, which hold their beautiful color a long time without fading. The plant is a vigorous grower and thus makes a splendid climbing rose trained to porch pillars, pegged down to the ground in beds, or on trellises. When in full bloom and covered with its great clusters of flowers, containing from thirty to fifty blossoms each, it is a magnificent sight. It has proved entirely hardy in this country, and is a great acquisition to our rose garden.

Baltimore Belle—Very double pale blush, in large clusters, completely enveloping the whole plant with bloom; one of the best climbers.

Dorothy Perkins—This is a splendid, new, shell-pink climbing rose. It attracted much attention at the Pan-American Exposition, where a bed of fourteen-months-old produced a show of bloom unequalled by any other variety, unless it was the famous Crimson Rambler. This rose is of the same strong habit of growth as Crimson Rambler, and the flowers are borne in clusters of thirty to forty and sometimes even fifty to sixty. The flowers are large for a rose of this class, very double, sweetly scented and of a beautiful shell-pink color. Absolutely hardy.

Prairie Queen—An old standard variety and one that will always be popular. No collection of hardy climbing roses is complete without it. Bright rosy red, frequently striped with white, large, compact and globular flower.

Some Bloomed Three Times

Dear Sir:—The rose bushes I received from you last spring were the finest I ever bought. I planted fifteen in my own rose garden, and every rose has bloomed twice and some three times. We cut fresh roses from three bushes today. “Baby Rambler” is loaded with buds. “Dorothy Perkins” bloomed full and made a growth of six feet of vines, and I have never yet seen anything to equal “Frau Karl Druschki.” Every bush was true to name. F. O. Williams.
We are greatly pleased to offer our customers this year some new Strawberries of great merit. An improvement over many kinds being offered by other dealers and growers. We find that it pays to grow only the best for big returns and good results. You must grow good varieties to succeed. It is absolutely necessary to do it or you fail, no matter how good your ground is. Get the best, it costs no more. We have built up a good business by sending out the best stock, true to name, that has made our customers money and friends for us.

**Strawberry Plants by Mail**

At dozen rates we prepay postage, at hundred rates add 20c. per 100.

---

**Climax.**

Climax, Per.—This new berry was originated in Maryland and has become quite popular. The Climax is supposed to be a cross of Bubach with Hoffman. The foliage is beautiful light green that can be distinguished from other varieties as far as you can see the patch. The plants are strong and hearty, no rust. The Season of ripening, second early, size of fruit rather above medium, productiveness simply immense. We think that no variety ever offered had a greater record for immense productiveness than has the Climax. **Price,** 30 cts. per 12, 65 cts. per 100, $4.00 per 1000.

**Nick Omer, Per.**—A fancy market berry and always superb for the table. A giant in size; it is deep red all through, globular, high-flavored, delicious. **Price,** 35c. per 12; $1.00 per 100.

**Uncle Jim, Per.**—It is wonderfully productive and the fruit is large. The fruit stalks are exceedingly stout and when borne down with fruit the berries do not lie on the ground and rot like some large kinds, before they are ripe enough to pick. A variety for home garden where the highest quality is desired. **Price,** 35c. per 12; $1.00 per 100.
The World's Wonder

World's Wonder, Per.—This great strawberry originated with Mr. R. G. Parsons of Maryland, one of the largest strawberry growers in that state. We bought this wonderful new berry of Mr. Parsons last year, and planted out several thousands of plants and they are looking remarkably well and do not show any signs of rust.

The World's Wonder is as productive as the Haverland, but twice as large. Fruit is a bright red in color and does not turn dark after being picked. Uniform in shape, large size, good keeper and shipping berry. Ripens early and brings extra fancy price on market. Vines are strong, thrifty and rapid in growth. Will produce a large crop on either high or low land. The fruit is so firm and its keeping qualities are so excellent that it does not need to be picked oftener than once in three days. It is a variety that will please you and you can make lots of money by planting World's Wonder. You will have to order early as our stock is limited, as we intend to plant several acres, as we know we can make more money by planting them out for fruit.

Price of World's Wonder Strawberry, 35 cts. per 12, $1.00 per 100, $8.00 per 1000.

Early Beauty, Per.—This new berry originated in Iowa. Last year was the first time we fruited it. With us it ripens earlier than any other variety. The fruit is medium to large, about the size and shape of Haverland and fully as productive. Plants make a vigorous growth and are free from blight and rust. It is the best strawberry of the early varieties that we have fruited and we can heartily recommend this berry to our customers who want an extra early kind. Price, 35c. per 12; $1.00 per 100.
Abington, Per.—This new berry was sent out last spring by Lester Blanchard, of Massachusetts, who claims that it is the best yielder of any perfect blossomberry that has been introduced up to date.

Mr. Blanchard says:

"The Abington is the chance seedling, the plant is large, foliage dark green, the fruit stalks are strong and stand erect from the ground, the blossom is perfect, large and full with lots of pollen. It ripens with the Bubach, the berries being very large, averaging as large as the Bubach and holds out well during the entire season. Mr. Blanchard claims the Abington to be more productive than the Bubach or Glen Mary, either of which is productive enough for best results; in color it is bright red with firm flesh and good flavor. Mr. Blanchard claims to have grown the Abington at the rate of 9,720 quarts per acre, and says it is a berry that will take the place of Bubach, as it is a better plant maker, blossoms perfect and hardy, sends up more fruit stalks, and ripens at the same time. The berry has a better color, firmer, better flavor, runs larger throughout the season and holds its color better after it is picked."

We can say that it is a fine grower of large, strong, healthy plants, and so far, are well pleased with its appearance.

**Price of Abington, 35c. per 12; $1.00 per 100.**

---

**Oaks Early, Per.**—This new strawberry originated in Maryland. It is claimed to be three times more productive than the Michaels Early and also a stronger grower. Fruit large and brings a fancy price on the market. We have no doubt but what this variety will prove valuable as an early berry.

**Price of Oaks Early, 35 cts. per 12, $1.00 per 100.**

**Armstrong, Per.**—This strawberry was brought over from Germany several years ago. It is very large and very productive on heavy soil and it produces very large berries.

**Price, 30 cts. per 12, 65 cts. per 100, $4.00 per 1000.**

**Brandywine, Per.**—A late and firm berry; a good shipper and canner, in fact, a good all round berry and does best on heavy soil. This strawberry is being largely planted in this state; very productive; fruit large and of good color, bright red all over and of good quality.

**Price, 25c. per 12; 50c. per 100; $3.00 per 1000.**

---

**Senator Dunlap, Per.**—Season early to medium. Popular market sort. It withstands all conditions of weather beyond the average. Very productive, dark red through and through. If you want a variety that will give you good returns do not fail to plant the Senator Dunlap.

**Price, 25c. per 12; 50c. per 100; $3.00 per 1000.**

**Bubach, Imp.**—Fruit large, handsome, roundish conical, bright scarlet, moderately firm, of fair quality; plant a strong grower, with large healthy foliage, very productive; succeeds on light or heavy soil. Desirable for home use and near-by market. Has proved to be one of the best strawberries. Season early to medium.

**Price, 25c per 12; 50c. per 100; $3.00 per 1000.**

**Echo, Per.**—Introduced by us. This great table berry has the highest and richest flavor of the natural, wild strawberry which is quite unknown among native varieties. Very productive; fruit large and mostly planted for family use.

**Price, 35c. per 12, $1.00 per 100.**
**Stevens' Late Champion, Per.**—A late money-making variety, yielding enormous crops of large, beautiful and good berries that ship well very late in the season after all other varieties have ripened and disappeared. The plant is an exceptionally healthy and good grower. Anyone who wants a good late kind should plant Stevens' Late Champion, as it is properly named. Price 35c. per 12; 75c. per 100; $5.00 per 1,000.

**Ryckman** (or $100.00), Per.—This new variety is very highly spoken of by all who have tried it. The plants make a strong growth, free from rust. The originator claims for it superb flavor, size, color, shape and firmness. Heaviest yielder of the giant sort. It is certainly worthy of a careful trial by everyone. Price 35c. per 12; $1.00 per 100.

**Wm. Belt, Per.**—A well tested variety that is giving remarkable satisfaction as a large, handsome, productive berry for market or home use. Vigorous, thrifty, heavy plant, producing large crops under good, common culture. Berries extra large, conical, quite uniform in shape; brilliant, glossy red; ripens all over without green tips; good quality; carries well to market and brings highest price. Price, 25c. per 12; 50c. per 100; $3.00 per 1,000.

We have the following additional varieties which are too well known to require separate description: Beder Wood, Clyde, Glen Mary, Sample, Earliest, Haverland, Michaels Early and Wilson. Price, 25c. per 12; 50c. per 100; $3.00 per 1,000.

---

**Minnesota, May 16, 1906.**

Dear Sir,—I wish to acknowledge the receipt of the berry plants you shipped. They arrived in excellent condition. I am well pleased with them as they are the best plants I have ever received.

Mrs. J. B. McCain.

**Maine, May 9, 1906.**

Dear Sir:—The strawberry plants and fruit trees just arrived and I wish to say that they came in fine shape and are the best I have ever seen.

Fred O. Hanscom.

**Kentucky, May 1, 1906.**

Dear Sir:—I received the strawberry plants that you shipped me, yesterday and they came in fine condition.

Mrs. S. H. Carnegy.

**Maine, May 24, 1906.**

Dear Sir:—Received the strawberry plants in fine condition. They are the best plants that I have ever received from any nursery.

Isaac A. Johnson.

1. You cannot grow figs from thistles, neither can you grow perfect fruit from an inferior quality of stock.
2. Always investigate an offer of Something for Nothing. Find out who does the paying. 3. Same with "Gift" Nursery Stock.
4. The A B C of successful fruit growing — Buy good stock and then take care of it.
Red Raspberries

Note—if you want Raspberry plants sent by mail or express, add 12c. per dozen, and 40c. per 50 plants.

Loudon—A red mid-season berry. Large fruit, beautiful, rich dark crimson color, good quality, enduring winter without protection and without injury to the very tips. It stands shipping the best of any variety, and will remain on bushes the longest without injury. 60c. per 12; $2.00 per 100.

Ruby, Earliest of All.

C. G. Velie & Son (Fruit Growers) in introducing this berry, say: “The Ruby Raspberry is a seedling of the well-known Marlboro variety. It partakes of its parent in its habit of growth, but is much more hardy and vigorous. Canes growing six or more feet in height with a good strong foliage. The fruit is born in great quantities, a very prolific bearer and of large size, a good bright color and firm. An excellent shipping berry. It has proved itself to be the most profitable sort wherever tried. Ripens with the earliest.’’ Do not fail to plant the Ruby. 4 for 25c.; 60c. per 12; $3.00 per 100; $20.00 per 1,000.

Golden Queen—Yellow Variety—This variety is almost identical with Cuthbert, except in color. Fruit large, productive; quality first-class. It is beyond doubt the finest and most profitable yellow berry grown. 60c. per 12; $2.00 per 100.

Marlboro—Large size, light crimson color, good quality and firm. Vigorous and productive. One of the best, well tested, large early berries for the North. Price, 40c. per 12; $1.50 per 100; $10.00 per 1,000.

King.—An early red raspberry; round, medium size, light crimson, firm and of excellent quality. A seedling of Thompson and ripens about the same time, but larger and more productive. It is far ahead of Loudon or Millers on our ground. Price, 60c. per 12; $2.00 per 100.

Schaffer—This is the best-known of the purple Raspberries. It is very vigorous, large and productive. It picks easier than Columbian, but is not so firm. Price 40c. per 12; $1.50 per 100; $10.00 per 1,000.

Ruby.—New — This early new berry is just what fruit growers have been looking for. In the Ruby we have earliness, vigor, hardiness, large size and very productiveness. Qualities that will give it a foremost rank. It resembles the Marlboro in color of fruit, but is a stronger grower. It has been grown commercially for six years and today stands ahead of all others as a berry for the growers to plant for profit.

What Large Fruit Growers Say About Ruby:

Orange Co., N. Y., Nov. 10, 1905.
Dear Sir:—We have grown the Ruby Raspberry for the past two years and find it a prolific bearer. The canes grow large and healthy. The fruit is very large and ships exceedingly well, being very firm. We think it a very valuable market berry as it starts to ripen ahead of any other variety and continues through a long fruiting season.

Wm. C. Young & Son.

Ulster Co., N. Y., Nov. 11, 1905.
Dear Sir:—We find the Ruby Raspberry just as you represented it. We set out 2000 plants and the first year picked 4500 pints. We consider it the best berry to plant.

J. & E. Lawson.

Ulster Co., N. Y., Nov. 16, 1905.
Dear Sir:—I think the Ruby Raspberry the very best variety grown, as it is healthy, has a good color, is a good shipper, and free picker. I picked this last summer from 1000 plants, one year old, 4500 pints.

Henry Coitiant.

Dear Sir:—During the past season from 3500 hills of the Marlboro Raspberry, I picked 3000 pints, while from 950 hills of the Ruby I shipped 4750 pints from a two-year-old patch. They are very vigorous and need planting further apart than other varieties. They are firm and stand up well in the market. When Marlboros sold for 6 cents per pint, I received from 10 to 12 cents for Ruby.

Nicholas Phelan.
Herbert.

Herbert (Iron-clad Variety)—New—A seedling found about fifteen years ago, by Mr. Whyte, of Ottawa, Canada, and was sent out by him in 1896 to the Experimental Station for testing. It has undergone a thorough test beside all the older varieties, as well as all the later productions and has completely outclassed them all in hardiness. It has stood 30 degrees below zero without freezing. Fruit is bright red, somewhat oblong in shape. It is the largest of all red raspberries, larger even than the Cuthbert; sweet and juicy. Very best for table use. Enormously productive, outbears the Cuthbert and is a week earlier. Holds its size well to the end of the season. Price 25c. each; $2.00 per 12; $10.00 per 100.

What the Experimental Farm at Ottawa, Canada, Says About the Herbert.

We have closely observed the Herbert Raspberry growing on the farm for the last few years and consider it ahead of Cuthbert, which is classed as the best red raspberry now on the market. As judge at the Ottawa Horticultural Society's Shows for the last six years, I have always been more favorably impressed with the fruit of the Herbert raspberry than any others, and have always awarded it first prize.

Columbian, Very Productive.

Columbian—This great berry is believed to be a cross between Cuthbert and Gregg, and is superior and larger than Schaffer, which it resembles in type and color. We recommend it for all garden and general planting. For canning purposes it is undoubtedly the very best Raspberry in cultivation, yielding as high as 8,000 quarts per acre. Unlike some kinds, it does not go to pieces in the process of canning, and does not shrink. It is very popular and is known from Maine to California. A dozen strong plants will supply a family with fruit, as it grows from eight to twelve feet high, and in fruiting season its branches are covered with fine, large crimson berries. Perfectly hardy, and grown largely for evaporating, retaining color, form and flavor remarkably. Price, 40c. per 12; $1.50 per 100; $10.00 per 1,000.
Wood's Improved Cuthbert, Most Profitable Market Raspberry.

Cuthbert, Wood's Improved Red—Has excelled all other late varieties of Red Raspberries. For the past eleven years we have propagated it from our very best bushes and now have Cuthberts far ahead of the average. One fruit-grower who saw our fruit in 1901 ordered 30,000 plants of us the next year. In 1905 his crop of Cuthberts averaged him over $300.00 per acre. No fruit-grower can afford to omit planting Wood's Improved Cuthbert, and surely no person who has a garden should attempt to get along without this Red Raspberry. If you need Raspberry plants it pays to buy the very best stock. The Cuthbert is the leading market variety all over the country. Remarkably strong, hardy variety; stands Northern winters and Southern summers equal to any. Berries very large, measuring three inches around; conical, rich crimson, very handsome; so firm they can be shipped hundreds of miles in good condition; flavor sweet, rich, luscious. Price, 30c. per 12; $1.00 per 100; $8.00 per 1,000.

If you want Raspberries sent by mail, or express prepaid, add 12c per 12, 40c. per 50 plants.

Black Diamond—Has distinguished itself among the fruit growers of Western New York. It is the leading variety for market and home use. In Black Diamond we have vigor, hardiness, large size, quality and productiveness. Berries are about the size of Gregg; ripens early; sweetest berry known; fine flavor; with few seeds, yet firm enough to be an A No. 1 shipper. For drying and evaporating it excels all others. The dried fruit is jet black and retains the richness, fine flavor and sweetness of the ripe fruit. Price, 40c. per 12; $1.50 per 100; $10.00 per 1,000.

Ohio—Black—An old well known variety. Fifteen years ago it was one of the most popular commercial varieties, but it is being superseded by better kinds. It is still grown in some parts of the country for drying purposes. Price, 40c. per 12; $1.50 per 100.

Palmer—Black—Early; fruit dull black and of good size; nearly sweet, good in flavor and quality; considered very valuable in some localities on account of its earliness; one of the first of the blackberries to ripen. Price, 40c. per 12; $1.50 per 100; $10.00 per 1,000.
Kansas—More largely planted than any other Black Raspberry.

Gregg—Black—
Plants vigorous, hardy and productive; fruit above medium to very large; attractive black; firm and rather sweet when fully ripe; good to very good in flavor and quality, although not as productive as some other varieties. Price, 40c. per 12; $1.50 per 100; $10 per 1,000.

Cumberland—
Black—Plants vigorous, hardy and productive in most places. Fruit large, attractive black; juicy and rather sweet when fully ripe; very good quality; one of the most desirable varieties for commercial purposes. Mid-season. Price, 40c. per 12; $1.50 per 100; $10.00 per 1,000.

BLACKBERRIES.

If you want Blackberry plants sent by mail, or express prepaid, add 12c per 12, and 40c. per 50 plants.

Rathbun—A strong grower, medium height; forms a neat compact bush from four to five feet high, branching freely. It suckers but slightly; roots penetrate deeply into the soil; a valuable characteristic in dry season and locations. The fruit is large and handsome; jet black, high polish without any hard core; juicy, highly flavored; of such superior quality that it is in a class by itself; resembling the Wilson, but larger and of better quality. Very desirable for canning or table. Price, 40c. per 12; $1.50 per 100; $10.00 per 1,000.

Iowa, May 9, 1906.
Dear Sir:—I received the blackberries and thank you for the same. Everything is planted and looks well and if we can raise small fruit here successfully, you will hear from us again.
Respectfully,
Mrs. W. D. Myers.

Pennsylvania, April 8, 1906.
Dear Sir:—Your shipment of vines and plants as per my order arrived here a few days ago. I am pleased with the stock as they are thrifty and all have large roots. I have set them out and I shall take good care of them.
Jno. Offerman.
Blowers—"The giant of all Blackberries;" found in Chautauqua Co., N. Y., some fifteen years ago. An upright mammoth grower; very hardy and enormously productive. Large, glossy and luscious berry. We saw it growing in four places last year and it was extra good everywhere. One fruit grower told us that it had not failed with him since it commenced to bear nine years before. A single plant produced over 2,600 berries. It commences to ripen about the middle of July and bears about two months. Fruit is very large and of good quality.

In 1905, Mr. Blower, the originator, sold his crop in Buffalo, N. Y., for $3.52 per 32 quart crate, or 11c. per quart. On one bush they counted 2,694 berries. In 1906 the crop was sold for $4.00 per bushel. The bushes are so strong and tall that they can carry a great crop. Price 2 for 25c.; $1.00 per 12; $5.00 per 100; $40.00 per 1,000.

Hon. John S. Lambert, Supreme Court Judge.
"I saw a sample of Blackberry bush known as the Blowers Blackberry, something over 13 feet high and loaded with the most delicious fruit I ever saw. It was a surprise both in the size of the bush and berry, as well as quantity of fruit, as I had never seen or heard of anything that approached this display. In my opinion it will absorb all other varieties."

Snyder—An old, variety; plants vigorous to very vigorous, healthy; canes large, upright and hardy. Fruit medium, roundish. A valuable standard commercial variety, and grown in many places on account of its hardiness, although the berries are inclined to be rather small, but if you keep the soil rich with barnyard manure and wood ashes, no one will complain of the size. Price, 40c. per 12; $1.50 per 100; $10.00 per 1,000.

Minnewaski—One of the largest and most productive; on trial several years and receives most favorable reports from nearly all sections. Fruit glossy, black, tender, juicy, sweet, fine aromatic flavor. Remarkably productive and hardy. One of the best for market and home garden; early. Price 60c. per 12; $2.00 per 100; $15.00 per 1,000.

Ohmer—Late market variety; plants vigorous; canes rather large with but few prickles; productive. Fruit above medium, roundish; juicy, rather acid even when fully ripe; good flavor and quality, although not as productive as some varieties, but it has made a fairly good record on our farm. Price, 60c. per 12; $2.00 per 100.

Early Harvest—Earliest to ripen. Fruit medium size, glossy black, very juicy, fair to good in flavor and quality. Valuable on account of its earliness. Price 40c. per 12; $1.50 per 100; $10.00 per 1,000.

Eldorado—One of the hardiest; fruit medium to large, sweet and juicy; good color; excellent in flavor and quality. Has made a good record in many parts of the country as a commercial variety. Price, 60c. per 12; $2.00 per 100; $15.00 per 1,000.

Erie—Strong Grower. Will produce good crops on poor soil. Fruit large, roundish, good flavor, rather acid. Price, 40c. per 12; $1.50 per 100; $10.00 per 1,000.

Early King—Ripening about a week earlier than most varieties. Not as productive as some of the later varieties. Fruit medium size, slightly oblong, good color, fair flavor and quality. Price, 50c. per 12; $1.50 per 100; $12.00 per 1,000.

Blowers—2,694 Berries on This Bush.
Pomona—Medium size, clear bright red, excellent quality; hangs long time after ripe; holds up well on market; is one of the best for shipping; easily and cheaply picked. Holds an unparalleled record for actual acreage yield in ordinary field culture. Price of two year old plants, 50c. per 12; $3.00 per 100.

President Wilder—This variety is very popular with fruit-growers. It is one of the strongest growers and very productive. Bunches of berries very large, bright attractive red color and hangs on bushes longer than any other variety. Not as large as Fays but longer bunches and better quality; much less acid. Ripens same time. Price of two year old plants, 50c. per 12; $3.00 per 100.

No. 18
State of New York
Department of Agriculture

Certificate of Inspection of Nursery Stock

This is to certify that the stock in the Nursery of Allen L. Wood, of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Chapter 519, of the laws of 1902, and it was found to be apparently free in all respects from any contagious or infectious plant disease or diseases, or the San Jose scale, or other dangerously injurious insect, pest or pests.

C. A. Wieting,
Commissioner of Agriculture.

When you buy our Nursery Stock you deal directly with the growers. You have a great advantage over those who buy through agents or middlemen. We take as much interest in filling each of our thousands of orders as we did years ago when we made our first shipments.
You are sure of fair treatment if you buy from the Woodlawn Nursery.

Red Cross—Greatest of all currants. Rural New- Yorker says: "Red Cross is the best of all old or new currants for mid-season." N. Y. Experiment Station says it is large and productive. The masses of fruit were so dense as to completely hide the bearing canes from view. Jacob Moore says this is a peculiarity of the Red Cross. We have cut off some of the branches thus heavily laden and sent them to the Rural New- Yorker, Country Gentleman, as well as to leading pomologists. These people have said they never saw anything to equal the Red Cross as shown by specimen branches. E. W. Reid says he is remarkably impressed with this variety, especially for its large size and productiveness, it being much superior to Fay's in every respect. We have picked stems of this currant seven inches long with 23 to 26 currants upon a single stem. It is the most vigorous grower of all currants we have tested. It seems as though this variety would create an epoch in currant growing. You can not make any mistake in planting the Red Cross Currant. The plants we offer are well rooted and very strong. Now is a good time for planting currants, as there is a large demand for the fruit. Price of 2 yr. plants, 50c. per 12; $3.00 per 100.

Cherry—Strong grower, fruit very large, sometimes measuring one-half inch in diameter. Should have good soil and thorough cultivation. Price of two year old plants, 50c. per 12; $3.00 per 100.

Lee's Prolific (Black)—Considered one of the best black Currants. Fruit large; produces abundantly. Never attacked by insects of any kind. Valuable for making jellies, jam and wine. Price for two year old plants, 50c. per 12; $3.00 per 100.

We also have these additional two year old Currants, 50c. per 12; $3.00 per 100. La Versailles, Prince Albert, North Star, Victoria, Red Dutch, Black Champion and Black Naples.
If you want Gooseberries sent by mail, or express prepaid, add 12c per 12; 40c per 50 plants.

Downing—One of the oldest and best. Large, handsome, pale green, of splendid quality, for both cooking and table use. Vigorous grower and usually free from mildew. Price of 2 yr. old plants, 10c. each; $1.00 per 12; $6.00 per 100.

Houghton—A very productive hardy berry of medium size, and for general purposes one of the best. Price of 2 year old plants, 10c. each; 75c. per 12; $5.00 per 100.

Industry—An English variety. It is very popular in England. Fruit is large size, color dark red. The best of all English varieties in this country. Price of 2 year old plants, 15c. each; $1.50 per 12; $10.00 per 100.

Pearl—Best American variety—a cross between Houghton and a large English variety; very hardy, free from mildew, superior in size and quality, and more productive than Downing; is likely to supersede this standard sort. From many flattering testimonials we take pleasure in recommending this variety as one of the best. Price of two year old plants, 10c. each; $1.00 per 12; $6.00 per 100.

Red Jacket—An American seedling of large size; smooth, prolific and hardy, of best quality. Well tested over a wide extent of territory with all leading varieties. A wonderful cropper; bright, clean, healthy foliage. Price of two year old plants, 10c. each; $1.00 per 12; $7.00 per 100.

RHUBARB

Rhubarb (or Pie Plant)—For Family or Market. We have millions of well-rooted Rhubarb plants for sale. Have you a bed of Rhubarb in your garden? If not do not fail to start one this spring.

Rhubarb (Myatt's Linnaeus)—Early, tender and very large; known as the sweetest of pie plants. Price of two year old plants, 10c. each; 60c. per 12; $3.00 per 100. Extra large, three year old plants for forcing in greenhouses, 15c. each; $1.00 per 12; $4.00 per 100.

Two Year Old Grape Vines, Showing the Remarkable Fine System of Roots Produced at Woodlawn Nurseries.

Virginia, April 3, 1906.
Dear Sir:—Plants, vines and roses received in splendid condition. They are the nicest and best rooted plants that I have ever received from any nursery.

L. O. Haden.

Pennsylvania, April 18, 1906.
Dear Sir:—I received my order of grape vines all right, in good time and condition. Please accept my thanks as I am very well pleased with the stock.

Philip Fetter.
McKinley Early Grape.

McPike—This mammoth black grape has been exhibited in all parts of the country. Its great size, fine flavor and beauty creating quite a sensation. The bunches are large, even and compact, the berries sometimes three inches in circumference, covered with a rich bloom; ripening evenly and keeping well. The vine is very strong and thrifty in growth with great, leathery leaves. Ripens with Worden. Price of strong two year old vines, 15c. each; $1.50 per 12; $10.00 per 100. One year vines, 10c. each; $1.00 per 12; $8.00 per 100.

Worden (Black)—A splendid grape of the Concord type, larger, better quality and earlier. Vines vigorous, hardy and productive. Price of strong two year old vines, 10c. each; 75c. per 12; $3.25 per 100; $30.00 per 1,000. One year vines, 7c. each; 60c. per 12; $2.50 per 100; $22.50 per 1,000.

Campbell’s Early (Black)—Strong grower, with large, healthy foliage; productive, its keeping and shipping qualities are equalled by no other early grape. Ripens with Moore’s Early, but will keep in sound, perfect condition long after that variety is gone. Bunch and berry large, glossy black, with blue bloom, sweet and juicy, seeds few and small, part readily from the pulp. Stands at the head of early black grapes for quality. Price of strong two year vines, 15c. each; $1.50 per 12; $10.00 per 100. One year old vines, 10c. each; $1.00 per 12; $8.00 per 100.

Moore’s Early (Black)—Bunch and berry large, round, with heavy blue bloom; vine exceedingly hardy. Its earliness makes it desirable for an early market; its hardiness particularly adapts it to Canada and northern portions of the United States. Price of strong two year vines, 10c. each; 75c. per 12; $4.00 per 100; $35.00 per 1,000. One year vines, 7c. each; 60c. per 12; $3.00 per 100; $27.50 per 1,000.

Note. If you want Grapes sent by mail or express, prepaid, add 12c. per 12; 40c. per 50 plants.

McKinley Early Grape.

McKinley Early, New—If you want extra quality and a very sweet grape, plant the McKinley Early. It differs from all other grapes in the fact that the pulp has no acid and parts easily from its few seeds, the skin has no puckery taste. It is the coming early grape for the market. It is a cross between Niagra and Moore’s Early. Strong grower, bunches large, compact and handsome; berries large and oval like Malaga grapes; green at first, turning to yellow when fully ripe; very sweet. Extra quality; a good shipper; remarkable keeper, will hang on vines sound and perfect for weeks after ripe. All grape growers will appreciate the value of an early white grape as large and productive as Niagara and fully ten days earlier, with the richest flavor of any grape on the market. Price of two year old plants, 25c. each; $2.50 per 12.
Concord—Most Profitable Hardy Market Grape. (See Bargain Price.)

Concord—This hardy black grape is decidedly the most popular grape in America and is more largely planted than all the other kinds put together. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender but sufficiently firm to carry well to a distant market; flesh juicy, sweet, tender. Vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety. Bargain Prices for strong two year old vines, 8c. each; 55c. per 12; $2.25 per 100; $20.00 per 1,000. One year vines, 5c. each; 45c. per 12; $1.85 per 100; $17.50 per 1,000.

Agawam (Roger's No 15) (Red)—Berries very large, thick skin, pulp soft, sweet, sprightly, very vigorous, ripens early.

Diamond—Leading early White Grape, ripening before Moore's Early. White, rich yellow tinge; juicy, few seeds, almost free from pulp; excellent quality; above medium size, adheres firmly to stem. Like Concord in growth, hardiness and foliage. Fine for both market and garden.

Pocklington—Or “Golden Pocklington,” retains its popularity, being one of the largest and most showy white grapes of the Concord type yet introduced.

Catawba—Berries large, round; when fully ripe of a dark, copper color, with sweet, rich musky flavor. Requires a long season to arrive at full maturity.

Lindley (Rogers' No. 9)—Berries medium to large; flesh tender, sweet and aromatic; ripens early.

Price of Agawam, Diamond, Pocklington, Catawba and Lindley strong two year old vines, 10c. each; 75c. per 12; $3.50 per 100. One year vines, 8c. each; 60c. per 12; $2.50 per 100.

Alice—New Red Grape, ripens with Concord. Keeps all winter plump and fresh as when gathered without shelling or loss of flavor. Hardest in vine and fruit, strong grower, free from mildew or disease; immense yielder, 40 to 60 clusters per vine; high quality, rich in sugar, has stood the test for ten years under all conditions; is to-day one of the most valuable grapes before the American vineyardist. Price, 25c. each; $2.50 per 12.

Dr. F. M. Hexamer, Editor American Agriculturists, N.Y., writes:

The samples of Alice Grapes arrived in excellent condition. They were tasted on March 15th by several persons of refined taste and all declare they had never tasted such delicious grapes at this season of the year.

Niagara—Occupies the same position among white varieties as Concord among black; leading profitable market sort. Bunch and berries large, greenish white, pale yellow when fully ripe. Skin thin, but tough; quality much like Concord. Price of strong two year old vines, 10c. each; 75c. per 12; $3.25 per 100; $30.00 per 1,000. One year vines, 8c. each; 60c. per 12; $2.50 per 100; $22.50 per 1,000.

Brighton—Perhaps best Red Grape in cultivation. Bunch large, compact; strong grower and very productive; quality good.

Salem (Rogers' No. 53)—Bunch large, compact; berry large, round, coppery red, tender, juicy; slight pulp; one of the best. Ripens with Concord. Vine healthy, vigorous and productive.

Delaware—Red, finest flavor. Bunch and berry small, compact; sweet, thin skin; slow grower; requires good soil and careful handling.

Price of Brighton, Salem and Delaware, strong two year old vines, 8c. each; 65c. per 12; $3.50 per 100.
Carolina Poplar—A vigorous, healthy, native tree of rapid growth, pyramidal in form, with large glossy leaves. Valuable for parks or street planting. Makes a fine spreading head if well cut back the first few seasons. Succeeds everywhere. Price of Carolina Poplar, 6 to 8 feet high, 35c. each.

Norway Maple—One of the hardiest ornamental shade trees. Its large compact habit, broad deep green shining foliage and its stout, vigorous growth, renders it one of the most desirable species for street, park or lawn. Rather a rough, crooked grower while young, but soon develops into straight magnificent specimens. Price of Norway Maple, 6 to 8 feet high, 75c. each.

Horse Chestnut (White Flowering)—A very beautiful, well known tree, with round, dense head, dark green foliage, and in early spring an abundance of showy white flowers, slightly marked with red specks or panicles. Price of Horse Chestnut, 5 to 6 feet high, 75c. each.

Golden Willow—A showy variety with golden bark of high color, making it very conspicuous during winter. A handsome tree at all seasons. Price of Golden Willow, 6 to 8 feet high, 65c. each.

Mountain Ash—A fine hardy tree; head dense and regular, covered from July till winter with great clusters of bright red berries. Price of Mountain Ash, 6 to 8 feet high, 50c. each.

Silver Maple—A hardy, rapid growing native tree of large size. Valuable for producing a quick shade. Excellent for street planting. Price of Silver Maple, 6 to 8 feet high, 50c. each.

Sugar or Rock Maple—A popular American tree of excellent pyramidal form. Its upright habit of growth, dense shade and adaptability to different soils, has rendered it one of the most extensively used. Valuable for sugar and timber, as well as ornament and shade. Price of Sugar or Rock Maple, 6 to 8 feet high, 75c. each.

Wier's Cut-leaved Maple—This is one of the most remarkable and beautiful trees with cut or dissected foliage yet offered. Its growth is rapid, shoots slender and drooping, giving it a habit almost as graceful as the Cut-leaved Birch. One of the most beautiful trees for lawns. Price of Wier's Cut-leaved Maple, 6 to 8 feet high, 75c. each.

Cut-leaved Weeping Birch—One of the most elegant of all weeping or pendulous trees. Its tall, slender, yet vigorous growth, graceful, drooping habit, silvery white bark and delicately cut foliage presents a combination of attractive characteristics rarely met with in a single tree. Price of Cut-leaved Weeping Birch, 5 to 6 feet high, 75c. each.

We have thousands of Flowering Shrubs, Vines and Ornamental Trees. If you do not find what you need in this catalog, write to us for prices. We can save you money on anything you might need.
Paniculata Grandiflora

Althea (Rose of Sharon, Tree Hollyhock)—The Althea is a flowering shrub and is represented in many colors, the prevailing colors being white and bluish-purple. The Althea has been called by some the Tree Hollyhock, since its blossoms resemble those of the Hollyhock. When in full bloom the Althea is ablaze with blossoms. We have the Altheas in different colors, pink, purple, white, and pink and white. Price of strong two year old plants, 25c. each.

Van Houtte—The grandest of all the Spireas; it is a beautiful ornament for the lawn at any season; but when in flower it is a complete fountain of white bloom, the foliage hardly showing. Perfectly hardy and an early bloomer. Price of strong two year old plants, 25c. each.

Bechtel's Double-Flowered Crab—One of the most beautiful of the many fine varieties of flowering Crabs. Tree of medium size, covered in early spring with large, beautiful, double fragrant flowers of a delicate pink color. From a distance the flowers have the appearance of small roses. A great acquisition, and certain to become very popular as soon as known. Blooms when quite young. Price of two year old plants, 50c. each.
The great trouble with tree pruners has been their intricate mechanism, any part of which getting out of order, wholly incapacitates the pruner for service.

Why not use a pruner that Never Gets out of Gear, simply because of its automatic action? All you have to do with The Automatic Pruner is to place it in position over the limb you desire to remove, and a quick, sharp pull downward, and off goes the limb, leaving a nice, clean, smooth cut. The trouble with other pruners is that the cut is usually uneven and "ragged," so to speak. It looks more as though the limb had been chewed off, and, of course, it is acknowledged that in pruning trees a clean, smooth cut is very essential to prompt healing of the wound.

The Automatic Pruner Will Take Off a Limb an inch in diameter With Perfect Ease. Should there be larger limbs to be removed, then the saw part of the pruner comes into service, but limbs of the latter size are decidedly in the minority in pruning trees, and, therefore, it would be comparatively rare when the saw would be used.

With the AUTOMATIC PRUNER there DOESN'T have to be ANY CAREFUL ADJUSTMENT of IT in the TREE to enable the freedom so necessary to work pruners which are made with springs and handles and levers and with heavy rope or wire appliances running from the knife part, or head of the pruner, down to the bottom of the handle in order to work the knife, and with the old-fashioned kind of pruner very little pressure can be brought to bear on the knife, and, therefore, only the smallest limbs can be removed with them, where with The Automatic Pruner, when you stop to think of it, a limb an inch in diameter can be as easily removed as one a quarter of an inch in diameter, as it simply means a little more exertion on the part of the operator in putting a little more of his weight on the handle.

The METAL PARTS of the AUTOMATIC PRUNER are made of the finest cold rolled steel, with the exception of the blade, which is made of the finest blade steel manufactured.

Where the Pruner is attached to its handle IT is INSULATED WITH HARD VULCANIZED RUBBER, thereby cutting off the electric current should the pruner come in contact with electric wires when in operation.

We call your attention to the clipping herewith from the "Philadelphia Inquirer." Had the handle of this poor man's pruner been insulated at the
All bolts used in the manufacture of The Automatic Pruner are what are known as shoulder bolts, and, therefore, very strong; that is, with the exception of the bolts for the exchange of the blades, which are screw bolts and are to be kept tightly screwed up after the blade has been inserted, for the tighter the bolts are screwed, the better the blade works, as they do not allow the blade to get out of alignment.

Your attention is particularly directed to the **TWO STOPS** on the principal leverage bar, thereby regulating the stroke of the blade.

The cut showing the smooth cut made by the Automatic Pruner is that of a limb an inch in diameter of a Sycamore tree. If you know the Sycamore, you will realize that its wood is very hard, and you will acknowledge, we think, that for such a hard wood this cut is a very clean, smooth one. If the Automatic Pruner will make such a clean cut in such hard wood, you can well understand, we think, that with ordinary fruit tree wood it will be even smoother and cleaner, as any fruit tree wood is not anywhere near as hard as the wood of the Sycamore tree, and there are very few shade or ornamental trees whose wood is as hard as the Sycamore.

The **HANDLE of the AUTOMATIC PRUNER** can be made **ANY LENGTH DESIRED**. It is furnished with one 10 ft. handle complete. Two or more of 7 ft. each, connected by a double screw ferrule and insulated, can be supplied at a very small cost. The 10 ft. handle will answer for the majority of purposes, but if a longer handle is desired, by screwing two 7 ft. handles together you have one 14 ft. long. Any height desired can be attained by merely screwing on additional 7 ft. handles, and the metal parts or ferrules where these handles are joined are also insulated with hard vulcanized rubber, thereby preventing any danger from electric shock, should the pruner be operated during an electric storm.

Your attention is respectfully directed to **cut No. 1**, showing the Automatic Pruner in its normal condition.

**Cut No. 4**, shows the blade advancing, and **Cut No. 2**, shows the Pruner on the limb and with the blade close to it, and **Cut No. 3**, shows the limb falling, and also the clean, smooth cut that has been made, and with the blade back in its proper position, having fallen there immediately after the limb was severed, and ready for another limb, as the Pruner is ever ready for service, being automatically open for action immediately after a limb has been cut off, thus doing away with all springs, etc. for the purpose of opening the blade for another cut. No ropes, wire, lever, etc. for regulating the blade for business preparatory to cutting are required.

**THE AUTOMATIC PRUNER can BE OPERATED EASILY WITH ONE HAND**, thus enabling the user the free use of the other in climbing a ladder into a tree or maintaining his position while in the tree, a decided advantage that will be readily recognized.

**ONCE THE PRUNER is PLACED in POSITION a QUICK, SHARP PULL is all that is REQUIRED to Sever a Limb.** The
hook of the Pruner conveniently covers a limb one inch in diameter, but where larger limbs are to be amputated, the saw, made of the finest saw steel, can be easily adjusted in the top of the head of the Pruner by simply loosening the top screw and insert the saw, as shown in the cut.

The Automatic Pruner is furnished in PLAIN STEEL, ENAMELLED & NICKEL-PLATED.

With the PLAIN STEEL it is necessary to see that it is thoroughly dried after using in order to prevent rusting, which would be decidedly detrimental to future operations.

The ENAMELLED makes this care unnecessary to a very great extent, although we would recommend that care be exercised in seeing to it that the Pruner was pretty well dried before putting it away, but with the NICKEL-PLATED this care is entirely unnecessary, and therefore, the NICKEL-PLATED is what can be considered RUST PROOF.

The Price for the plain steel is $3.00; enamelled, $3.50, and of the nickel-plated, $4.00.

EXTRA BLADES can be furnished at $1.50 per dozen, or 75c per half dozen, and a 12-inch saw at 20c each, or a 14-inch saw at 25c each.

In view of the fine quality of steel used in the blades, they retain a sharp edge for a long time and can be easily sharpened on an oilstone.

To facilitate despatch during the pruning seasons we advocate the having on hand of several extra blades (from a half dozen to a dozen) thereby facilitating despatch, and when the pruning season is over, or when it begins, these blades can be very easily sharpened, and then there is no delay on account of dull blades.

The HANDLES are made of the BEST HARD WOOD, and are, therefore, very strong, unbreakable with ordinary use. The idea of using hard wood for the handle is because the greater weight of the hard wood handle over the soft wood lessens the exertion of the operator in the pulling down process of amputating a limb, and it is also a desirable feature in adding the required weight to the saw where the saw is called into requisition.

The cuts of the Automatic Pruner will readily show the working parts of it to be all on one side, allowing the greatest possible freedom for the adjustment of the hook over the limb to be removed. There is absolutely nothing to interfere with this, and which with the ordinary pruner is one of the objectionable features, requiring no little skill and effort to adjust the pruner properly preparatory to the amputation of a limb.

The AUTOMATIC PRUNER has received the HEARTIEST ENDORSEMENT of park superintendents, gardeners and orchardists as being THE BEST PRUNER in existence today.

Further information regarding the Automatic Pruner will be gladly furnished on request, and soliciting your patronage, believe us.

Yours very truly,

ALLEN L. WOOD,

Woodlawn Nurseries,

Rochester, N. Y.
FATAL SHOCK FLEW THROUGH TREE SHEARS

Gardener Thrown Into Branches and Died a Few Minutes After Being Rescued.

Philadelphia Inquirer, Nov. 21.

While trimming a tree upon the property of Mrs. C. Twaddell at Oak Lane yesterday, James Whitman, 40 years old, a gardener of Wilson street, Oak Lane, met his death from electricity in a most peculiar manner. A long cutter which he was holding got caught on an exposed portion of an electric light wire and not only threw the man into the branches of the tree but, owing to the manner in which it had caught the wire, kept sending a heavy voltage of electricity through his body.

Seeing the man's plight, Mrs. Twaddell retained presence of mind and telephoned to the Electrical Bureau at City Hall asking that the current be turned off and that assistance be sent to the unfortunate man.

The handle of the cutter was a piece of wood eight feet long, and had it not been damp it would not have conducted the current to the man's body.

In response to Mrs. Twaddell's call the current was cut off and an ambulance from the Jewish Hospital was soon on the spot. Whitman died a few moments after he was rescued from the tree. His body was taken home. He leaves a wife and three children.

It would be impossible for this to happen with an Automatic Pruner, as it is thoroughly insulated.

ALL PACKED IN BALES OR BOXES FREE OF CHARGE.
Hardy Hydrangea Paniculata Grandiflora—Too well-known to require description. Probably the most popular of all shrubs. Blooms in August and September. Flowers when we have few shrubs in bloom. Flowers white, in pyramidal panicles often a foot in length. Excellent plant for masses or single specimen. Large plants, two years old, 25c. $2.50 per 12.

Snowball—A well-known favorite shrub, with globular clusters of white flowers frequently borne in clusters of five or six. Price of two year old plants, 25c. each.

Deutzia, Pure Double White—A variety having double flowers, which are white, tinged with pink, and which are produced in racemes from 4 to 5 inches long in great profusion.

Deutzia, Pride of Rochester—Is a variety raised and introduced by Ellwanger & Barry, and blooms a week earlier than the other varieties. The flowers are large, double white, slightly tinged on the back of the petals with rose.

Deutzia Rosea—Red flowering, very attractive and should be included in every collection.

Prices of the above varieties of Deutzias, 2 year old plants, 25c. each.

Double White Lilac—This fine double flowering variety is of a pure snow white color. Its flowers, which are composed of a number of corollas, are borne in enormous panicles, larger than other varieties. Price of strong two year old plants, 25c. each.

Lilac, Purple—The well known variety, one of the best. A good grower; flowers and young wood fragrant; purple. Price of strong two year old plants, 25c. each.

Halleana—Hall’s Japan Honeysuckle.—A strong, vigorous, almost evergreen sort, with pure white flowers, changing to yellow. Very fragrant, and covered with flowers from July to December; holds its leaves till January. The best bloomer of all. Price of strong two year old plants, 25c. each.

California Privet—Makes one of the handsomest hedges imaginable. Wherever a close, compact hedge is desired we recommend California Privet. Should be planted 8 or 10 inches apart to give best results. Price of strong two year old plants 10c. each, 75c. per 12, $5.00 per 100.

</table>

To ascertain the number of plants required to the acre at any given distance, divide the number of square feet (43,560) in an acre by the number of square feet you desire to devote to each plant. For instance, in strawberries planted 1 1/2 by 3 feet, each hill will occupy 4 1/2 square feet, making 9,680 plants to the acre.
